Art Unit: 2651

1. This Office action is in response to application papers filed 6 January 2006, which papers have been placed of record in the file.

2. Claims 1, 5-16, and 20-29 are allowed over the prior art of record. The following is an examiner's statement of reasons for allowance:

Claims 1 and 16 are allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose a slider flying-height controller and a hard disk drive comprising the heater current controller includes a square-root circuit receiving the input current and outputting a first current that is proportional to the square root of the input current, and the control current is proportional to the first current, as presented in the environment of claims 1 and 16. The closest prior art, Bloodworth et al., shows slider fly height control similar to the claimed invention, including heater current control. However, Bloodworth et al. fails to disclose the heater current controller includes a square-root circuit receiving the input current and outputting a first current that is proportional to the square root of the input current, and the control current is proportional to the first current as claimed.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
